Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 8-12, 31-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Youn (US Pat. 5,847,924).

Regarding claims 1-2, 8-12, 31-35 Youn discloses a computer system comprising: a display housing comprising a display 22a and a CPU (not shown); a base comprising a keyboard 24a; and a base flap 40 pivotally attached to the display 22a housing and pivotally attached to the base 24 so that the display housing 22a may be oriented to rest on the base 24 with the keyboard 24a exposed for use with the display 22a wherein the display housing 22a further comprises connectors 27 for external peripherals wherein the base flap 40 is attached so that it may be wrapped around the display housing 22a wherein the base flap 40 is removably attached to the display housing using a latch 24 wherein the latch 24 permits the base flap 40 to pivotally rotate against the base 24 wherein when the display housing 22a is oriented to rest on the base 24, the base flap 40 and the base 24 fold under the display housing 22a with a portion of the base flap protruding.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Youn (US Pat. 5,847,924) in view of Rezek et al (US Pat. 5,321,420).

Regarding claims 3-7, Youn discloses all the subject matter of the claimed invention except for controls to control speaker volume and display brightness, indicators for at least one of battery power remaining, hard drive access, and power mode, a speaker portion, a microphone and a power button, an embedded wireless antenna, communication port. However Rezek et al disclose controls to control speaker volume and display brightness, indicators for at least one of battery power remaining, hard drive access, and power mode, a speaker portion, a microphone and a power button, an embedded wireless antenna, communication port (see figure 1). Therefore, it would be obvious to one of ordinary skill to modify controls to control speaker volume and display brightness, indicators for at least one of battery power remaining, hard drive access, and power mode, a speaker portion, a microphone and a power button, an embedded wireless antenna, communication port of Rezek's display into Youn's display in order to be convenient for users.

Art Unit: 2835

5. Claims 18-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Youn (US Pat. 5,847,924) in view of Rosenberg et al (US Pat. 6,429,846).

Regarding claims 18-28, Youn discloses all the subject matter of the claimed invention except for a display housing including a tablet, the tablet having an underlay to receive signals input by a pen. However Rosenberg et al disclose including a tablet, the tablet having an underlay to receive signals input by a pen (see figure 8A). Therefore, it would be obvious to one of ordinary skill to modify the tablet having an underlay to receive signals input by a pen of Rosenberg's display into Youn's display in order to be alternately input.

Allowable Subject Matter

6. Claims 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show that the base may be oriented to cover the display, the computer system further comprising a second display accessible when the primary display is covered by the base.

7. Claims 36-44 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show that a display housing having a first surface having a

first display and a second surface opposite the first surface having a second display;
and a base pivotally attached to the display housing to alternately protect the first display in a closed position and expose the first display in an open position.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
